

Frühjahrssemester 2013

Klinik für Onkologie USZ
Klinik für Radio-Onkologie USZ
Kinderspital Zürich

Kolloquium in angewandter Krebsforschung

Mittwoch, 8.15 Uhr, Kurszimmer OST, HOER B 15

- 06.03.2013 **Immune-response related pathways activated by radiotherapy and their impact on therapeutic efficacy**
Laura Surace, Oncology, USZ
- 13.03.2013 **In vivo imaging of osteosarcoma**
Sander Botter, Balgrist
- 20.03.2013 **Cancer secretome:
Identification of treatment-activated resistance mechanisms**
Asish Sharma, Radio-Oncology, USZ
- 27.03.2013 **Functional characterization of CD70, a biomarker specific for clear cell renal cell carcinoma**
Melanie Ruf, Institute of Surgical Pathology, USZ
- 03.04.2013 **Inhibition of autocrine VEGF signalling in cancer cell line proliferation and progression**
Caroline Hyde, PSI
- 10.04.2013 **Combined treatment modality of ionizing radiation with inhibition of epidermal growth factor signaling by ankyrin repeat proteins**
Martina Zimmermann, Radio-Oncology, USZ
- 17.04.2013 **Investigation of the role of Hedgehog signalling on mesothelioma recurrence**
Mayura Meerang, Laboratory of Thoracic surgery, USZ
- 08.05.2013 **Hedgehog signalling regulates stem cell compartments in embryonal rhabdomyosarcoma**
Sampoorna Satheesha, University Children's Hospital
- 15.05.2013 **Drug profiling for identification of new targets in refractory leukemia**
Viktoras Frismantas, University Children's Hospital
- 22.05.2013 **Role of lnc RNA GAS5 in mesothelioma**
Arun Renganathan, Laboratory of Molecular Oncology, USZ
- 29.05.2013 **Cancer stem cells in alveolar Rhabdomyosarcoma: Fact or fiction?**
Elisa Casanova, University Children's Hospital

Organisation:

Organisation: Prof. Beat W. Schäfer, Prof. Martin Pruschy

Vorlesungsverzeichnis Nr. 1212
